

HEALTHCARE SCIENCE AND NURSING

Providing students access to relevant and meaningful college coursework that builds a foundation for post-secondary career and college success is fundamental mission of all Connecticut high schools. To be successful, district and school leadership continuously work in partnership with Connecticut Institutions of Higher Education (IHEs) to provide students with the strongest pathways possible. Through the collective capacity of multiple partnerships, school districts can provide wide-scale access to career pathways that support student interest and career aspirations.
